CALLC/AABCO/REF/0001  
5<sup>th</sup> August 2010

To whom it may concern

Dear Sir / Madam,

**Ref: The National Museum project, Muscat, Oman.**  
**Subject: Reference for AABCO services for Reinforcement Bar drawings and schedules**

We are pleased to write and advise that our sub-contractor AABCO have been employed on the above project for the last five months, during which time they have successfully produced our reinforcement bar drawings and bar bending schedules (BBS) for our concrete building structure.

The overall efficient level of service provided by AABCO on the above project has been consistently delivered in a prompt and professional manner. Without exception AABCO staff and representatives have provided us with a pro-active, helpful and friendly service.

All structural drawings released by our Designers were carefully checked and reviewed by AABCO, and where necessary if information needed further clarification, technical queries were consistently raised in a timely manner through a properly logged system of Requests for Information (RFI), which enabled us to forward these promptly to our Consultant. The efficient identification and early request for information enabled us to avoid delays when the BBS schedules were finally released and issued.

Workshop drawings produced by AABCO have always been clear and detailed to the level required, and provided sufficient information to the site team. To date all information produced by AABCO has been accurate and correct. Fortunately all BBS schedules have reached us on time on this project, which ensured that relevant information required for our cutting and bending operations were not delayed at any time.

AABCO have provided us with an all round efficient and professional service and we would therefore not hesitate to recommend AABCO for the production of Reinforcement drawings and bar bending schedules on any future project.

Yours faithfully,  
For Carillion Alawi LLC.

  
Phil Tyrer  
Project Director
